

# THE EMPRESS EXPRESS

VOLUME XVIII, No. 43

EMPRESS, ALTA. THURSDAY, Mar. 26th, 1931

Price: \$2.00 Per Year.

## United Church

Church School 2:00 p.m.  
Public Worship, 7:30 p.m.  
Subject: "The True Inspiration" (Palm Sunday).  
Text: "And the writing was of Jesus of Nazareth the King of the Jews."  
"The Way Home is the Way of the Cross."  
Rev. Geo. A. Shields,  
Minister.

## Canada To Put Wheat Up To World Group

New York, March 14.—Economic issues which will directly affect the economic welfare of a large percentage of the earth's population will come up for discussion and possible adjustment at the international wheat conference which will be opened in Rome on March 26, according to G. H. Williams, formerly president of the United Farmers of Canada, who will represent the Canadian farmers at the conference, Mr. Williams left here for Italy on the Conte Grande of the Lloyd Sabaudo Line, last night.

He is going to Rome, he said, in the hope that it will be possible for the five great wheat-exporting countries of the world—Argentina, Australia, Russia, Canada and the United States—to form an agreement not to flood the world's market with export grain and to maintain the world price at a level that will make it possible for the farmer to cover his costs of production. At present, he declared, the Canadian farmers and those in many other parts of the world, were suffering greatly because of the disorganized world market for their product.

"I am firmly convinced that an international selling agreement is the only salvation for exporting wheat countries," Mr. Williams said, "in all countries like Canada, where export wheat plays so large a part in the national economic structure the situation is extremely critical."

## Manitoba Seeking Cheap Alberta Coal

Edmonton, Alta.—The Manitoba Government, in conjunction with the federal government, is seeking ways whereby Alberta coal can be landed in Manitoba more cheaply than at present. They are now considering the proposal to carry Alberta coal in barges down the north and south branches of the Saskatchewan river, through Lake Winnipeg into the city of Winnipeg by the connecting waterways. Their reports state that by bringing coal down on barges, it can be landed in Winnipeg at the capital city of Manitoba, for \$3 a ton cheaper than the present cost.

A survey was made before the war by the federal government as to the feasibility of using this water route and it was found that it would not involve a very heavy outlay to dredge out certain portions of the riverways to make them navigable all the way. Should this project become established, it is understood that cheap fuel would be distributed all over the prairies via the route of the north and south branches of the Saskatchewan river.—Saskatoon Monitor.

"I can speak best for the Canadian. He is today in the same position as the business man who finds himself facing a condition in which overhead exceeds income. One of three things must happen—he must cut down his overhead, increase his income or go out of business."

"There are two ways he can cut down his overhead. One is to reduce his standard of living. Or he may set about a unification of his marketing agencies into one. There are three other costs of production with which the farmer cannot cope by himself, but needs the aid of government and private industry. These are transportation costs, the costs of government and the cost of machinery, and all of the things he must buy to maintain his farm."

## Cutworm Invasion Possible

Serious outbreaks of pale western cutworm are forecast by H. G. Seaman, Dominion entomologist at Lethbridge, states the Herald. This will occur in certain sections of the west this season. Southwestern Alberta will escape, he declares, but southeastern Alberta will suffer in the territory from Bow Island to the Saskatchewan boundary.

A serious plague may be expected north of the Red Deer River, along the Grouse Lake line of the C.N.R., and including the Drumheller, Morrin and Hanna districts, right through to Alaska.

## Fire Damages Bakery

Fire badly damaged the premises of the Empress Bakery early on Thursday (today). The fire had worked under the oven and travelled the bottom of the flooring and joints and dense masses of smoke and steam made it difficult to locate. It was only after some three to four hours fighting that it was finally extinguished. Good work was done in keeping the fire confined. If the flames had ever succeeded in getting a hold on the sides of the building it would have been difficult to check. The alarm was given at 6 o'clock. A fire occurred in the same building a little over a year ago. The work done by citizens in stopping the spread of the flames is worthy of much praise.

## Hospital Notes

Little Dorothy Scott is improving rapidly after pneumonia, and will soon be discharged.

Born To Mr. and Mrs. Earl Gunnar, a son. Mother and baby are both doing well.

Mr. Thos. Hughes, of Buffalo, is still an inmate of the hospital, following a motor accident some days ago.

Mr. S. Hurle, Buffalo, is a patient, receiving treatment for an infected hand.

Blair Mack, of Bindloss, is

"And even so, unless he enters into a marketing agreement with the Russian authorities, he is faced with ruinous competition."

What will come out of the Rome conference cannot be predicted, but will profoundly affect the farmers in all parts of the world who have wheat to export, and, therefore, the manufacturers and merchants who manufacture goods for them to buy, Mr. Williams said.

## The Empress BAKERY

Get-Your Bread, Cakes and Pastry from us.

Town Deliveries made if required.

Bread 3 Loaves for 25c.

MURRAY  
The Baker

Coal, Wood, Contract Work or

GENERAL  
DRAYING  
Light or Heavy Work

Transfer to and from C.P.R. Depot

E. H. FOUNTAIN  
Phone No. 9

## Glider Demonstration

There was a large gathering in the sand hills west of town on Sunday, to witness the glider flight. Much interest was evinced as this motorless ship was constructed by the members of the club in their leisure time, and irrespective of any other consideration, its construction is a marvellous achievement. The performance on Sunday gave evidence to show that the machine is air-worthy and to all intents and purposes as good as a factory made product. Hartley Shannon was the pilot. Four brief flight demonstrations were given.

## Bridge Tournament

A bridge tournament was played here last week between Empress and Bindloss. The Empress players were the winners.

For Bindloss—H. MacDonald and G. Cameron, defeated McGill and Brodie.

For Empress—Stothers and Dr. Ludliff defeated Anderson and Hall. Beach and Gay defeated Sirois and Davis.

## Debate At Alask

The debate held on Friday at Alask on the 100 p.c. marketing of grain, resulted in a win for the affirmative side. The debating teams were: F. Rowles and D. McEshern for the affirmative side and the negative, C. Evans, Bargant and J. Hawtin. There was present a large and enthusiastic audience. An enjoyable concert program was also given.

Improving since his admission to the hospital last Sunday.

Billie Paul is making steady factory progress after a severe illness.

Mrs. Melvin Smith is improving after a few days illness.

## Ferry Commences Operations

The snow of the south ferry was launched on Tuesday and ferry operations commenced. This early commencement of operations is a boon to the travelling public of both provinces as the ferry is in much use when in operation.

## Saskatchewan Has Deficit

Saskatoon, March 26.—Admission that the province would face a deficit was made this morning by the Hon. Howard McConnell, provincial treasurer, on his arrival in Saskatoon, where he will address a meeting of the Women's Conservative Association in the Y.M.C.A. tonight. Mr. McConnell was not able to give any estimate of the deficit at present.

He intimated that returns from the sale of liquor for the fiscal year ending April 30, at present show a decrease of 40 per cent.

The provincial treasurer stated that returns from the sale motor licenses this year show a great increase over the corresponding period last year. This is attributed to the mild weather and the complete absence of snow.

Mr. McConnell estimated that at least \$200,000 new revenue would be obtained from the sale of liquor permits. These are now on sale in all liquor and beer stores in the province.

Mr. McConnell will leave for Regina tonight after the meeting. He was busy throughout the day on matters pertaining to his department.

## Found

Rear lamp and bracket of Chevrolet car, owner may secure same by paying for this advt. at office of the "Empress Express."

## Horses For Sale

I have for sale some good farm work horses, young, good condition, well broken, ranging about 1500 lbs. Call Sale—Apply R. Hanco, Cavendish, Alta.

## Anglican Church

Sunday, March 29—Cavendish School, Holy Communion at 11 o'clock.  
St. Mary's, Empress, Good Friday, April 8, Evensong at 3 p.m.

## New Wrinkles In Preparing Seed For Exhibition

Purity of variety will be an important factor at the World's Grain Exhibition and Conference to be held in Regina in 1932, where growing tests will be conducted to determine the purity on all cereal exhibits shown.

L. H. Newman, dominion cerealist, and chairman of the awards committee of the 1932 international grain exhibition, told producers of Ontario a few days ago that they hope to capture the top prizes in the competitive classes they should sow the purest seed obtainable on a specially prepared piece of land. The crop should be allowed to fully mature, he continued, should be out and stacked, the best stalks being covered from the weather, and the best and ripest grain should be knocked out with a flail and saved for the sample to be shown at the exhibition. "Sieve out the grain carefully to get the most uniform seeds and finally handpick the samples for an exhibition of this kind where competition will be so keen and the prizes so well worth working for," he said.

The last night of the season for the Married People's Club is next Tuesday, when a Minstrel Show followed by a dance will be held in the theatre.

Now is the Time to Renew Your Subscription to the "Empress Express"

## Getting Ready for Shriners

Between 30,000 and 40,000 members of the Ancient Shriners will meet in Toronto next June under the leadership of John A. Fletcher (last), incoming Imperial Potentate of the Order. Hotels of the city, including the Royal York, will be insufficient to meet the demand, and the Canadian Pacific Railway is building a city of eleven cities to accommodate the Shrine, "Pax City," as it is called, will cover 21 acres of land and construction will be completed in 1932. The Shrine will be called "Pax City," as it is called, will cover 21 acres of land and construction will be completed in 1932. The Shrine will be called "Pax City," as it is called, will cover 21 acres of land and construction will be completed in 1932.

weighing 88 tons; 11 1/4 miles of 85-lb. rail weighing 780 tons; 55,000 tie plates weighing 150 tons; 46 tons of rail fastenings; 30 tons of track spikes; 8 tons of track bolts; 18,000 cubic yards of ballasting for 3 1/2 miles of platform; and 9,000 cubic yards of material for a building 220 by 20 feet wide will accommodate 100 cold and hot showers. Lighting will require 75,000 watts, enough to supply 14 miles of city residential street lighting power. This electrical work will call for 35 miles of wire strung on 200 poles. Photo shows site of Pax City.

## Last Night Married Peoples' Club

## MINSTREL SHOW AND DANCE

Tues., March 31

Commences 8 p.m. lasts until 2 a.m.  
CONTINUOUS MUSIC for Dance; no Supper Interval.

Everybody Welcome

Admission: 50c. and 25c.

## EASTER NOVELTIES

We have just received an assortment of Easter Goods including Chocolates and Chocolate and Candy Novelties for the children. Easter Rabbits Eggs, Chickens and other delightful designs.

Floral agents for: Swift Current, Medicine Hat, Calgary, Saskatoon, Regina and Edmonton Florists. We order from the nearest point.

EMPRESS DRUG CO., Ltd.

## Fine tea is far the most enjoyable

**Yellow label Salada 60c a lb**  
**Brown label Salada 70c a lb**  
 'Fresh from the gardens'

### Respect For The Law

Views entertained by people with respect to the majesty of the law seem to be divided into two main classes those who regard the laws of their country as having been enacted primarily for the protection of the rights and liberties of the people, and in the second group, those who act as if they considered all laws as infringement upon their rights and a denial of liberty to which they feel themselves entitled.

Speaking in a large and general sense, the former view is entertained and upheld in Great Britain, while the second view apparently animates a very large percentage of the people of the United States. Public conception of the functions of the law in Canada is divided between these two groups. Canada's judicial system, its code of laws, and its ideals and methods of law enforcement, are based on the laws of England, and have come down to us through the centuries, with precedent built upon precedent. But, on the other hand, living next door to the big republic, and with a daily intercourse which is not possible to the same extent with Great Britain, our people are naturally and incessantly influenced and affected by the prevailing trend of thought across the line.

Public concepts of the functions of law are the foundations upon which a nation is reared. It is, therefore, of vital importance that those concepts be sound and firmly established in the minds and ideals of the people. Throughout the United States today no one thing is causing public men, and the more seriously minded portion of the people, greater concern than the breaking-down of law in that country. Apart from the disastrous effect on the morale of the people, it is costing them in dollars and cents more than all the taxation imposed by governments, both Federal and State.

The trouble with the United States is that people have developed the belief, and the younger generation is growing up in that belief, that they can defy the law with impunity and get away with it; that laws are not designed for their protection, but quite the reverse; that courts and policemen are their enemies, not their friends and guardians of their rights and liberties.

Children hear the threat: "The cop will get you if you don't watch out," and even when engaged in innocent play the cry is raised: "Here comes a cop, let's beat it." And they beat it, only to return when the policeman has passed by.

In England, and largely so in Canada, an entirely different atmosphere, a different concept prevails. A policeman is not an enemy, but a friend, one to whom you can appeal when in trouble or difficulty.

We must, for our own good, maintain this attitude, and because of our proximity to the United States, and the constant intercourse between these two countries, it is essential that in our homes and schools the true conception and meaning of "the law," and the officers of the law, should be constantly taught and stressed. All law, in the beginning of law enactments, had but one object, the protection of the rights and liberties of individuals and communities against those who would deny those rights, usurp our liberties, and defraud us of our property.

Law is the reverse of lawlessness. It is orderly government as contrasted with mob-rule. It is the only safeguard against anarchy. Therefore, "the law" is something to be held sacred, to be upheld, to rejoice in; not to be regarded as something irksome, an evil, necessary perhaps for some, but to be doubted if one so desires. Laws should not be regarded solely or merely as prohibitions, restraints upon one's conduct. In their essence they are laws of protection, but rules of conduct, guides to follow, measures of protection.

In the final analysis, law is but the view of a majority of the people as to what they consider is in their own best interests. It is their own formally expressed will. That being the case they should respect and abide by it. A minority opposed to any given law should nevertheless respect and obey it as the will of the majority, just as they expect and insist that others should respect and obey laws of which they approve, but which some of those others, who may constitute a minority in opposition to themselves, consider unnecessary.

Disregard of law will undermine the home, the nation, and ultimately rob the individual of his own freedom and liberty of action.

**More Eggs Produced**  
 During the ten years since egg laying contests have been conducted by the experimental farms branch of the Federal Department of Agriculture a steady increase in the volume of egg production is noted. In 1929 the average of 5,250 birds trapped in these contests was 176.3 eggs per bird, an increase of fifty-four eggs per bird over 1919.

**Tree Inspections**  
 The inspectors of tree plantations sent out from the Dominion Forest Nursery Station, maintained by the Forest Service Department of the Interior, at Indian Head, Saskatchewan, made 12,300 inspections during the 1929 season.

The poorest marksmen may accidentally hit the target.

**PHILLIPS' MILK OF MAGNESIA**  
 For indigestion, constipation, biliousness, headache, nervousness, etc.

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs, which your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention, it has remained standard with physicians. You get it in a pleasant, easy-to-use form. Look for the harmless, no-chlorine, no-salt, no-painful, no-drowsy formula in water. (Made in Canada.)

### Canada's Fine Record

People Have Adequate Protection Through Savings of Banks

In the last thirty-seven years Canada has had 12 charters of bank failure. The total liabilities amounted to \$72,785,000. In the same period 9,476 United States banks have failed with liabilities of no less than \$3,754,370,000. On a strictly comparative basis, and after adjustment for the difference in population, this means that liabilities of U.S. banks which have failed have been four times those of Canadian banks.

According to official decennial census figures over the past forty years, average population of the United States during this period has been approximately 12 1/2 times greater than that of Canada. Thus a simple multiplication of the liabilities of Canadian banks which failed in the 37 year period, by 12 1/2, indicates that if Canada had the same population as the United States during this period the liabilities of failed banks would be approximately 900,000,000, or less than one-quarter of the liabilities which have been rolled up under the United States banking system since 1893.—Financial Post.

### Alberta Oil

Production Last Year Close To One and One-Half Million Barrels

Alberta produced close to one and one-half million barrels of oil in 1929, which compares with the provincial department of mines reveals. The total 1930 output was 1,433,844 barrels, which compares with 1,412,119 in 1929, an indication that Alberta's oil bubble is steadily expanding.

Naphtha from Turner Valley was the main product, with a total of 1,314,039 barrels. Light and heavy crudes accounted for the balance.

**Wonderful For Indigestion**

When your stomach feels bad; when you feel bloated, indigestion, heartburn, gas, etc., take a little of this wonderful medicine. It is the most effective and most reliable remedy for indigestion, heartburn, gas, etc. Ask your druggist.

**Ayrshire Breeders**

Association Received 76 Reports In January of Cows That Qualified In the R.O.P.

The Canadian Ayrshire Breeders' Association reports that during the period from January 1st to 26th it received 76 reports of cows and heifers that had qualified in the R.O.P.

Of the 76 reports, 41 were for cows, 37 for the 365 day division and 39 for the honor roll or 300 day division.

In the first classification 11 qualified in the mature class; 4 for the four year old; 7 in the three year old, and 13 in the two year old class. Thirty of the records were made on 20 milkings a day.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard their growth. They keep the child in a constant state of unrest, and if not attended to endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

**Roar Of Niagara "Photographed"**

The Niagara Falls Cataract has been photographed by the Niagara Falls Cataract.

According to Scientists the Niagara Falls Cataract has been photographed by the Niagara Falls Cataract.

Such was the conviction expressed by Dr. William Braid White, of Chicago, an acoustical expert, after he and Rev. John P. Delaney, physician professor of Catholic College, had photographed the sound waves of the cataract. The films were developed by Dr. White when he returned to Chicago. His observations, he explained, were from sound judgment.

"London traffic produced what we believed was the lowest sustained sound investigated up to the present time," said Dr. White.

**Canadian Indian Field Crops**

The total area under field crops on the Indian reserves in Canada in 1929 is reported at 201,165 acres. The acreages shown to the principal field crops were as follows: Wheat 42, 420, oats 30, 300, barley 7, 700, 2,840, peas 746, beans 748, buckwheat 1, 100, mixed grains 1, 028, corn for husking 1, 028, potatoes 5, 181, turnips 4, 411, land for hay 21, 716; alfalfa 1, 751; grain hay 1, 111.

The acreage under pasture was 39, 839, and in 1929, 23,146.

**For The Home Garden**

A horticulturist at the Ontario University says that the ten annual flowers most satisfactory for the home garden are: zinnia, cosmos, geranium, scabiosa, and chrysanthemum, calceola, corn flower, blue salvia and larkspur.

Always keep Douglas' Egyptian Liniment at hand, ready to bring immediate relief to burns, scalds, fleas, stings, bleeding at once. Prevents blood poisoning. Splendid for sore throat and quinsy.

When a good idea comes into your mind, do not give it a seat; put it to work.

### Restless CHILDREN

CHILDREN will fret, often for no apparent reason. But there's a simple remedy. It's often in the wrapper, mild and bland it's a youngster more surely than a more powerful medicine.

That's the beauty of this special children's remedy! It may be given in the form of a powder, or in the form of a liquid, or in the form of a tablet, or in the form of a capsule, or in the form of a pill, or in the form of a lozenge, or in the form of a candy, or in the form of a fruit, or in the form of a vegetable, or in the form of a mineral, or in the form of a chemical, or in the form of a biological, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a psychological, or in the form of a sociological, or in the form of a philosophical, or in the form of a theological, or in the form of a scientific, or in the form of a literary, or in the form of a historical, or in the form of a geographical, or in the form of a political, or in the form of a legal, or in the form of a medical, or in the form of a religious, or in the form of a moral, or in the form of a spiritual, or in the form of a material, or in the form of a mental, or in the form of a physical, or in the form of a a commission to investigate the possibilities of the northwestern part of the province with a view to building more railways. It would not be whether the railways were to be private enterprise or under government ownership. The people of the north wanted development and progress in education, science and communications. The government's recognition that government action might result from the suggestion came later from Premier James H. Henry. He said General Smith had made one of the most enlightened and constructive speeches on Northern Ontario he had heard, and stated the general's suggestion would receive the careful consideration of the government.

## Award Is Given To United States In Claim Against Canada

Secretary of States Stimson, in commenting on the report, expressed gratification it had been unanimous and praised the commission's efforts as proof of the value of joint arbitration methods to solve international problems.

This magnificent set of diamond and emerald earrings for pierced ears was sent to England immediately as a presentation to Viscountess Willingdon from the women of Canada. Each earring consists of 44 diamonds and one emerald. Miss Mildred Bennett, sister of the prime minister of Canada, is convener of the Viscountess Willingdon presentation committee. The centre is hand-moulded platinum ring with large oriental pearl, the whole set in solid gold case, also included in presentation from women of Canada.

## Churchill Townsite Opening May Be Necessarily Delayed Until August Of This Year

Not until August—if at all this season—will Churchill, Manitoba's new bay seaport, be opened to the public. Officials of the Manitoba Government, masters of the townsite, are seeking to surmount problems, which threaten to delay the town opening until August, a time so late it may be deemed better to wait until next season.

Clamoring hundreds ask permission to "get in on the ground floor" this summer at the dock-gate terminal of the Dominion Government's Hudson's Bay Railway. Business men, adventurers, pioneers who tend restlessly toward the north—these are the folk who are eager to be residents at Churchill in the "Zitcheou" townsite, the first steam wheat-bound across the Bay.

Opening of the town to the public will terminate the "engineers' paradise," which has existed since old Mike O'Brien's extra gang laid first steel into Churchill in the howling March gale of two years ago. Entry into Churchill has been allowed only on special permit, and workers engaged in track, harbor building and elevator construction have been under strict surveillance of the townsite.

Beyond the establishment of a trio of banks and the operation of a canvas-walled movie show blown down by the Bay gales, commerce has made virtually no appearance at the West's northern harbor. Food is served at the camp mess, sleeping quarters are provided, and work is there to be done; only bare necessities may be obtained by purchase, so that the townsite will finish a season at Churchill with a real "take."

Promise of export of shipping at Churchill this fall is only for a few weeks in late September and October, has occasioned a new rush of applications to set up a grocery, barber shop, restaurants and general stores at Churchill. The Dominion Government has pledged its effort to ship 750,000 bushels of wheat—three good-sized boat cargoes—this fall. Plans from Saskatchewan still ask shipments as much as 5,000,000 bushels of wheat.

In planning a decision on the townsite opening, the Manitoba Government is understood to be most concerned with the question of whether adequate preparations for an ingress of major proportions could be made by the beginning of August. It is believed unlikely to permit settlement at a later date this season, lest new residents be caught unprepared for the rigors of the sub-Arctic winter. Postponement until next spring may be considered advisable.

Fire protection regulations rank among the most important matters to be settled in connection with the site proper especially if the water supply is to be limited; yet officials realize that too drastic regulations will meet with pronounced opposition from the rough-and-ready pioneer type certain to predominate among early Churchill residents.

Indications are that fireproof, or at least semi-fireproof, buildings will be demanded within the limits of a certain portion of the townsite proper, which will be located on the rocky point forming the south side of the Churchill river's mouth. Possibilities that squatters may set up their two or three board "shacks" beyond the restricted area are foreseen, regretted—but not immediately disposed of.

Present plans of the Dominion Government are to bring water from the Roseberry Lake area, three miles south of the townsite, by means of a raised aqueduct in-

"I am sorry I was not at the opening of your restaurant."  
"Yes, the food may have been fresher than it is today."—Hummel, Hamburg.

W. N. U. 1939

culated against wintry cold.

Engineers who seek even greater assurance of permanent adequacy favor piping water from above tide-water on Churchill River, about three miles upstream from the town. Technical opinion differs as to which is the better plan.

Use of pumping equipment in connection with pipes from above tide-water, some engineers claim, would provide unlimited water supply and reduce fire hazard. Under this system, lines might be laid in the river bed, out of the reach of frost, virtually an ever-present threat in the Churchill area.

Drainage of the townsite, to be laid out within a few hundred yards of the river, covering 2,500,000 bushel grain elevator now under construction, is looked on at least partially as a problem. Water, seeping down from the ground surface, reaches the permanent frost line and is unable to penetrate further. It rises along this level and if a glaze in the frozen substratum is encountered, the water comes to the surface, resulting in a very muddy and very muddy area.

Beyond these major problems, the Manitoba Government must look to the main sewage plant, just to the east of the townsite, and the out the streets and avenues for the port north of '38, designate the location of the more important buildings to be erected there. Tentative decisions have been reached on most of the questions, but the uncertainty still remains as to whether Churchill can be held to its first citizens in time to settle them comfortably for the cold winter.

### Puts in Eight-Hour Day

**Frenchwoman 101 Years Old Works as a Stitcher in a Bookbindery**  
In these times of general business depression and unemployment the great fear of Helene Bonnet, who works as a stitcher in a bookbindery shop in Paris, was that she might lose her job. She knows how hard it is to get a job when you reach "a certain age."

It happens that Helene Bonnet has reached "a certain age." As a matter of fact, she is 101 years old, which does not prevent her from putting in an eight-hour day with the best of them. But she would never consent to tell her age. Neighbors and fellow workers imagined that she still entertained matrimonial hopes. They were hopelessly wrong. Helene feared the loss of her job.

### Pot To New Use

**Playing Cards Are Now Being Made Of Aluminum**

Aluminum is being used more and more for all sorts of purposes. It is being used for cables that carry electricity across country from power stations in place of copper and its latest use is in the making of playing cards.

These have the usual colored faces and backs and look and feel like ordinary cards, except that they are a little heavier. In the open air they will not blow away as do those made of cardboard, and if they become soiled they can easily be washed, which is a great advantage.

It is interesting to remember that aluminum, although one of the commonest of all metals, being found in clay, was only discovered as recently as 1807 by Frederick Wöhler, a German.

### Potato Harvest Of 1939

**Average Yield Shown At 85.6 Cwt. Per Acre Of Land**

The preliminary estimate of the total yield of potatoes in Canada, 1939, is 48,160,000 cwt. from 574,000 acres, or 85.6 cwt. per acre, as compared with 39,930,000 cwt. from 443,727 acres, or 78.4 cwt. per acre in 1928, and 41,000,000 cwt. from 455,257 acres, or 85.5 cwt. per acre, the average for the five years 1924-28. By provinces, the average yields in cwt. per acre are in order as follows: New Brunswick, 115.7; Nova Scotia, 115.0; Prince Edward Island, 106.0; British Columbia, 92.0; Alberta, 86.7; Manitoba, 85.7; Ontario, 78.4; Quebec, 78.0; Saskatchewan, 63.4.

The United States supplies the world with practically all its rubber eraser and rubber bands.

The gorilla is a more subtle and rober animal than the playful chimpanzee.

TWO EXPRESS VETERANS

Here they are, "Sandy" and "Earl," old friends of 10 years' standing, although Earl has had 18 years and Sandy Campbell, 29 years with the Canadian Pacific Express Company. His years of steady service in picking up and delivering goods for the company has given Earl much knowledge of his route, which covers the area of downtown Toronto around Bay and Adelaide Streets, that he trots up and down the streets without any help. Sandy gives him no orders for he knows his route as well as his driver. Earl is here shown mutely asking Sandy to carry on with his next delivery.

### Cooks Travel With Him

The Maharajah Jagannath Prasad Shaha of Deo, took his own cooks and cooking utensils with him when he went to Berlin. His cooks were allotted a special part of the kitchen in the Central Hotel. The cooks are said to have brought with them 100 different varieties of spices, roots and herbs, most of which are unknown in Europe.

Ice cream, packed in dry ice, recently made a 12-day journey from Seattle to Berlin.

### Seerss Predicts War

War will hit the world again, say the Communists, looking upon Russia, Spain having another republican uprising, and France escaping all military turmoil, according to Mme. Dore Thebes, a fortune teller who is endeavoring to take the place of the famous wily seerss in Europe, as a whole, will be in a turmoil, she predicts.

Living waters of lakes in Scotland are driving wild animals from their old haunts into the open.

## FASHION

No. 926—Sports Frock. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 3½ yds. of 35-inch material. Size 42 requires 4½ yds. of 35-inch contrasting.

No. 994—Blousier Dress. This style is designed in sizes 2, 4, 6 and 8 years. Size 4 requires 2½ yds. of 35-inch material with 1½ yds. of 32-inch contrasting.

No. 137—Smart Sophistication. This style is designed in sizes 2, 4, 6 and 10 years. Size 8 requires 2½ yds. of 35-inch material for dress and 1½ yds. of 35-inch material for blouse and 1½ yds. of 35-inch material for skirt. Size 10 requires 3½ yds. of 35-inch material.

No. 208—Pepin Model. This style is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust measure. Size 14 requires 4½ yds. of 35-inch material. Size 40 requires 6½ yds. of 35-inch contrasting.

## More Balanced Production Of Livestock In Canada Is Need Of Agriculture

### Dairy Congress

**World's Dairy Congress Will Be Held In Denmark This Year**

At the World's Dairy Congress, staged for the wonderful Christianborg Castle, Copenhagen, July 14 to 17 of this year, Canada will be officially represented by Dr. J. A. Riddick, Dominion Dairy Commissioner, who will speak on "The Trend of the Dairying Industry and Trade in Canada."

Denmark is seizing the opportunity of advertising her staple products of butter and bacon, by sending out great quantities of very attractive literature, profusely illustrated with the beauty spots of the country. Every piece carrying the tale of the wonderful production of eggs, bacon, butter, cheese and the slogan "No Farm Relief Needed in Denmark." Very cheap excursions are being offered by vessels plying to Denmark and from Knit Christian under whose direct patronage the congress is held, to the humberst of his subjects, farmers is buying itself out to give the visitors a good time.

### Opportunities In Sheep-Raising

**Imports Of Mutton And Wool Exceed Production, Growers Are Told**

With Canada consuming more mutton and using more wool than it produces, there is much opportunity for development, G. E. O'Brien, of the Co-Operative Wool Growers' Association, told the Ontario Sheep Breeders' Association at its annual meeting in Toronto. Mr. O'Brien stated that in the past 10 years lambs had increased from 2,000,000 to 3,000,000. Canada consumed 57,000,000 pounds of mutton this year, while the country produced only 10,000,000. Dr. J. H. Orsiddle, Canada's Deputy Minister of Agriculture, told the association. Lambs brought in from foreign countries were inferior to Canadian lambs, he stated, and forecast some changes in regulations governing imports of sheep and wool products.

### Russia's Wheat

**Program Provides For Increasing Production From Year To Year**

Russia's wheat crop in 1939 provided an exportable surplus of about a hundred million bushels, but next year, according to the Fish Report, is planned to make that surplus two hundred million, even though Russians go hungry. If it succeeds there will be practically no European market for the United States, as the American farmer cannot compete with grain raised on confiscated land by labor receiving an average of about fourteen cents a day. But that is not all. The Russian Government's programme is to drive its farmers to still heavier purposes production, and it hopes by the fall of 1932 to bring its surplus up to five hundred million bushels.—Duluth Herald.

### Dairy Industry In Canada

**Domestic Consumption Of Dairy Products Rapidly Increasing**

In a review of the dairy industry in Canada, Dr. J. A. Riddick, Dominion Dairy Commissioner, said that since 1921 domestic consumption of dairy products in Canada had increased to the extent of 35,529,247 pounds of butter fat equivalent. This is made up of an increase of 72,707,094 pounds in cheese; 1,267,919 pounds in cream; 2,541,261,027 pounds in milk, and 1,875,332 gallons in ice cream.

### Easily Fixed

A man who had had great difficulty in spelling words that had "it" and "ie" in them mentioned the matter to a friend.

"Oh," said the friend, "I have a ready remedy for that. It's infallible, too. I've used it for years and never been let down yet."

"The first man expressed his delight and interest, then waited for enlightenment."

"The rule is this," the friend declared, "if you have 'it' and 'ie' in a word, be sure and put your dot exactly between the pair of them."

### Trade With Russia

Canada's total imports directly from Russia last year were \$3,964,000, of which all but slightly over \$64,000 was the value of coal brought in from Russia. Canada's imports the previous year from Russia were \$3,964,000. Exports to Russia from Canada in 1938 were \$1,000,000, and the year before, \$2,300,000.

For several years farmers have been urged by those concerned in marketing farm products to take advantage of the many and varied fields open to them. In the best of that advice there was always the expressed desire to use more balanced production rather than the specialization in some staple to the neglect of others. The necessity of balancing production has been abundantly shown by the experience of the past months. Concentration on the export of grain, with a consequent framing of all policy in that direction, has been found to be unwise. When the inevitable day of low grain prices arrived there were not sufficient alternative sources of revenue.

If the advantage of having an alternative market for coarser grains, for instance, had been kept steadily in mind a policy would have been framed that would have favored cheap and efficient distribution of feed to livestock farmers in this country. If such conditions had been feared, farmers to consequence would have had a volume of hogs during 1929 and 1930, which would have made very good profits indeed in the export of carcasses and have had reasonable numbers of pigs to take care of a large part of the present year's production, which is almost unusable in the export markets. The export price for bacon is now very low but much of the grain that for some time has filled our elevator might have been marketed in the form of bacon before this happened. In the meantime European countries have increased their production of hogs and with cheap feeds have reaped big profits for the past couple of years. Now there is a glut of this product on the British market. But with extremely cheap feeds there may be no let up of production. It seems certain that the cream of profit for this period has been skimmed by the countries that had their production organized when prices were high.

Balanced production calls for an increase in livestock and livestock products in Canada, and the shaping of policies to that end. It does not, however, contemplate such things as wholesale rushes into hogs for the mere purpose of eating up available grain. When the grain situation straightens out export of grains will again form a very big part of Canada's business. But never again should it be permitted to engross attention to the neglect of an increasing volume of livestock products.

Steadiness in volume of supply is of equal importance to the well being of the Canadian hog and bacon industry as quality of product.

History shows that the most disturbing element in production is that those now rushing into hogs will not "stick" if low prices for their first crop of product should give a temporary setback to production. A rush out of hogs next fall would again set up the old cycle of gluts and shortages on perhaps a worse scale than ever.

Immediate prospects in the Canadian hog industry emphasize more than ever the need for more balanced production, less "putting of all eggs into one basket" in general, and less flocking into any one line that offers tempting prices merely because of conditions brought about by shortage rather than by the inherent value of the article. No sound industry can be built up if the bulk of producers quit when prices happen to fall and then come rushing back when prices rise in a way to create a glut and thereby again to disorganize the market. Such a policy hurts those who stay in steadily and gives no real profit to the "in and outers."

The imperative necessity for a healthy agriculture in Canada now is better regulated and more balanced production of all livestock, so that steady markets may be developed for the products which livestock yield.

"An alarm clock in the horse house!"

"Yes, the young cock woke up the alarm clock in the horse house. I hope things will be better," Dorf-harrier, Berlin.

## WORLD HAPPENINGS BRIEFLY TOLD

Canadian Indians, in 1929, numbered 108,012, the Department of Indian Affairs reports. One-half are listed as Roman Catholics.

The council of London, Ontario, has decided to support the Winnipeg resolution favoring the setting aside of the day after Christmas as a holiday.

More than \$35,000,000 was spent by the British Government in the last fiscal year to help finance projects for providing work for the unemployed.

More definite protection for the agricultural debtor from foreclosure was sought by the board of the United Farmers of Canada, in session recently at Saskatoon.

The Reverend John Hyde, 61, and his wife, 52, Nottingham, England, celebrated their silver wedding anniversary by passing the final tests for pilot certificates after 18 months of training.

February, 1931, will go down as the lowest February for the collections of national revenue in Montreal since the war. Only one other month, January, 1926, had lower collections than did February of this year.

The "rock pile" will be restored to all Ontario reformatories and jails in the belief that reformation is best accomplished by hard and productive labor. Prisoners will be provided with goggles to prevent the danger of eye-injury.

Price 50c a box

## Radio Gaining in Popularity

493,176 Receiving Sets in Use in Canada At End of January

At the end of January there were 493,176 radio receiving sets in Canada under licence or about one radio for about 20 persons in the country. The total of licensed receiving sets at the end of January was 69,030 more than the number in use at the end of the 12 month period of the Canadian Government fiscal year 1929-30. Toronto has more radios than any other city, with 77,194 at the end of the first month of this year. This total is nearly 15,000 more than was registered at the end of March, 1930, the close of the government fiscal year. Montreal is credited with 41,278 sets; Hamilton, Ont., with 16,532; Vancouver, with 19,530, and Winnipeg with 19,432. A charge of \$1 per year is made by the Canadian Government for a licence for a radio receiving set. Licences are issued free to the blind in Canada and the latest report shows 659 such licences have been issued.

## Popular Taste in Movies

Producers declare that really artistic films fail to draw at the box office. Those who are demanding "art" in motion pictures seldom are willing to risk their money in experimentation. The film theatre is not like a store where one may stock grades of goods to suit all tastes. The only successful movie house is one where a large percentage of the film shown pleases a majority of the patrons.—Los Angeles Times.

Birdseed raised in Argentina last year weighed 33,000 tons.

## Palpitation Of The Heart Nerves Were All Gone

Mrs. Rose Griffin, Ashern, Man., writes:—"About five years ago I was troubled with palpitation of the heart, caused by a shock, and my nerves were all gone and I could not sleep. I read about Milburn's Heart and Nerve Pills and decided to try them. After I had taken three boxes I was feeling fine again. I think they are a wonderful remedy, and with all others who suffered as I did would give them a trial."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## COVETS CAMPBELL'S RECORD

Norman "Wizard" Smith, Australian speed king, who will shortly make an assault upon Capt. Malcolm Campbell's world land speed record of 245 miles an hour, driving a car now under construction in Sydney, and with speed tests in New Zealand.

## Many Divorces in Canada

Eight Hundred and Seventy-Five Divorces Granted in Canada in Year 1930

A total of 875 divorces was granted in Canada during 1930, according to a return issued by the Dominion Bureau of Statistics. Of this number 347 were granted by the Dominion Parliament, and comprised marriage dissolutions in Ontario and Quebec. The remainder were decreed by the various courts of the other six provinces involved. No divorces were granted in Prince Edward Island, which province has had only one marriage dissolved in that fashion since confederation.

British Columbia headed the list for 1930 divorces, the figures in that Pacific Coast province being 255. Ontario had 207; Alberta, 151; Manitoba, 114; Saskatchewan, 62; Quebec, 40; New Brunswick, 27; and Nova Scotia, 39. This total of 875 was 59 more than the previous year, and was the largest in the country's history. Since 1913, a total of 7,756 divorces have been granted in the Dominion.

## Manitoba Mining Industry

Over \$62,000,000 Is Now Invested In

This industry Hon. D. G. McKenzie, Minister of the Department of Natural Resources for the Province of Manitoba, reports was the largest in the country's history. Manitoba's mineral production for 1929 over the previous year, the total production amounting in value to \$5,422,820.

Capital invested in the Manitoba mining industry is now computed to be over \$62,000,000. The year 1930 was the best yet in the mining history of Manitoba in the matter of advances towards mineral production. Mining expenditures that year were 15 per cent. over the previous year's figure of \$12,500,000.

## Railways and Air Routes

Joint Rail and Air Services May Be

Air developments, more particularly as they affect the operations of a large transcontinental transport system, are being closely watched by the Canadian Pacific Railway with a view to the inauguration of joint services, when the time is considered opportune. It was stated recently by E. W. Beatty, president of the Canadian Pacific Railway.

"If the development in air services, which is progressing satisfactorily, demands joint rail and air services, they will undoubtedly be provided by the Canadian railways," said Mr. Beatty.

Stump In Watch Industry The watch-making crisis in Switzerland appears to have been reached. July, 1930, was the poorest month in years, only 114,000 cases being turned out. But the heaviest decline has been in pocket watches and automobile clocks. The clock-makers, most of which in former years were exported to the United States, have nearly disappeared from the market.

An archaeologist states that until eighty years ago, almost all the known remains of ancient Babylon and Nineveh were in a little glass case in the British Museum.

It is predicted that cornstalks may eventually find their way into the manufacture of noiseless gears, insulating material, and similar products.

Poland's population has just been estimated at nearly 30,000,000.

W. N. U. 1880

## NO MORE ECZEMA

Nothing Ends Right Away  
I had eczema for several months. It was very itchy and sore. My skin was raw. I tried many remedies but nothing helped. Then I saw an advertisement for Eczema Cream. I bought a tube and used it. In a few days the itching stopped and the sores healed. Now my skin is smooth and clear. I am glad to say that I am cured. Eczema Cream really does it. All Druggists.

## Palladium Metal

Wollaston Metal Of Geological Society Of London, Is Made From Rare Metal Mined In Canada

The Geological Society of London's 101st Wollaston Medal was recently presented at Burlington House, London, England, to Dr. Arthur William Rogers, director of the Geological Survey of South Africa, according to word received by the International Nickel Company, of Canada, Ltd.

Awarded annually by the Society with the object of promoting research concerning the mineral structure of the earth, the medal this time is unique, that it is made of palladium group closely resembling silver in color, was discovered by Dr. William Wollaston, F.R.S., F.G.S., in 1803.

The metal was presented to the Society by the Mond Nickel Company, Ltd., who are important producers of that and other metals of the platinum group. In a speech at the presentation dinner, Mr. D. O. Evans, delegate director of the Mond Nickel Company, said remarkable progress had been made in the world's production of palladium since Wollaston's days.

The palladium used in the medal, he said, had been derived from the Company's vast resources in the nickel-copper ore regions of Ontario. These Canadian ores, he said, were worked primarily for their nickel content, palladium, platinum and other metals being a by-product. He said the International Nickel Company, of Canada, Ltd., of which Mond is a subsidiary, could now produce upwards of 100,000 ounces of palladium a year, which would represent a substantial proportion of the world's total production.

## New Radio Treatment

Professor Steiboeck, of the Vienna polytechnic, recently has been using three meter waves from a one-half kilowatt radio transmitter for treatment of inflammation of the lungs, such as is associated with influenza; cases of cancer and internal suppuration. He claims to have had encouraging success.

## Smallest Working Locomotive

What is claimed to be the smallest working locomotive in the world, made by J. J. Langridge, of Riversdale, Idelworth, Middlesex, is exhibited at the Wimbledon and District seventh annual exhibition at Wimbledon, England. The model, which runs by electricity, can be almost entirely covered by a postage stamp.

## Tuberculosis Among Indians

Appeal To Parliament For Additional Funds To Combat Disease

Special appeal to parliament for additional funds with which to combat tuberculosis among Indians was foreshadowed in the 1930 report of the Department of Indian Affairs. So many dralms have been placed on the appropriation for this purpose that "at the present time it is being found necessary to refuse applications for sanatorium treatment," the report stated.

Tuberculosis was described as the most potent disease to which Indians were victims. The report regretted that more progress was not being made in combating its progress.

"There are several reserves," the report said, "where the number of infectious cases is so small that the disease might be stamped out if it were possible to devote the whole of the appropriation for this purpose to these reserves. But equally strong appeals for help come from almost every reserve. At the present time it is being found necessary to refuse applications for sanatorium treatment due to lack of funds for maintenance. The department appeals to the interest of parliament for funds with which additional personnel and facilities may be provided. The proper course undoubtedly is to reduce the disease in its weakest places, namely on reserves where there are small numbers of cases, and where the resistance of the Indian is relatively high."

## Effectiveness Of The League

Building Up Friendship And Understanding Among The Nations

In a tension, plodding sort of way it goes on month after month building up friendship and understanding among the nations. Even Uncle Sam has been roped in. The latest "monthly summary" of the League's doings to hand records the coming of Frank B. Kellogg as successor to Charles Evans Hughes as a member of the Permanent Council of International Justice. Other events of the month were the signing of a Treaty of Friendship between Sweden and Persia and the settlement of an argument between Germany and Czechoslovakia about the use of the port of Hamburg. Little things, of course; but they help.

To many intelligent people of this generation war is no doubt inevitable, but there was a time when small-pox and other terrible plagues were inevitable too. By sanitation and vaccination, however, those scourges have been robbed of their sting. The League of Nations is a laboratory in which vaccines and prophylactics are being prepared against war. To suggest that they are bound to prove useless is to discourage the prospective patients and weaken their moral resistance. Sydney, N.S.W., Bulletin.

Reindeer in Alaska now number more than 1,000,000 head.

## Has Freak Eyesight

Objects At Close Range Magnified One Hundred Times

The eyes of Alva Mason, 25, an electrician of Minot, Me., are so focused that objects within a distance of eight inches are magnified more than 100 times their actual proportions. For ordinary work Mason has to use glasses that demagnify and another person looking through these spectacles might just so well be gazing through the wrong end of a telescope.

Objects more than eight inches from Mason's naked eyes appear blurred, but at a closer range he can even discern a photograph recorded by the difference in impression in the discs. Removing his glasses, he can point with unfailing accuracy to the recorded avial strokes in the "Anvil Chorus From 'Il Trovatore.'" Mason does not have to hear a record to determine whether or not a song was sung in a staccato or crooning manner. The sound grooves appear to him as the track made by dragging a finger through soft mud seem to the ordinary naked eye.

Pores of the skin and the infinitesimal holes in newspaper are quite apparent to Mason when he discards his glasses necessary for the greater part of his work.

## Size Of Bee Colony

An interesting experiment has been under way for the past five years to determine the approximate field force of a normal colony of bees. During this period, thirteen calculations have been made by officers of the Department of Agriculture, the figure varying from 22,187 to 39,687, but only on two occasions did the number fall below 10,000. It is reckoned that approximately 5,000 bees weigh a pound.

Fruit acids, paradoxically, counteract the acid effects of certain foods in the diet.

R. S. Sexton A. Heaton  
Proprietors

Thursday, Mar 26th, 1931

A fairly heavy shower of  
rain fell on Sunday afternoon.  
D. McEachern was on the  
sick list this week.

Mr. and Mrs. E. H. Fountain  
left on a trip to Calgary on  
Tuesday morning.

A number of visitors from  
outside points attended the  
glider demonstration here, on  
Sunday.

Mrs. B. S. Sexton, left on Sat-  
urday morning to visit with  
her daughter in Calgary.

Mr. and Mrs. Herb. McCune,  
and family, of Madison, Sask.,  
were visitors in town on Sun-  
day.

Don't forget the Easter Sale  
of Flowers and Home Cooking,  
to be held on Saturday, April 4,  
by St. Mary's W.A. Give your  
order for flowers to Mrs. N. P.  
Storey not later than March 30.

"Billy," son of Mr. and Mrs.  
Reg. Foul, was very ill last  
week with pneumonia.

Regarding change of train  
service on west end of line,  
reported date of change is April  
26th, and not March 26th.

Mrs. Coderre and family  
arrived from Fox Valley on Tues-  
day, to take up their residence  
on the farm.

The Ladies of the Congrega-  
tion will hold their regular  
monthly meeting at the home  
of Mrs. J. Stoney, Thursday,  
April 22d, at 3 p.m.

R. M. Mantario No. 262

Rowles—That Mrs. McCurdy  
be appointed caretaker of the  
Mayfield cemetery on the same  
terms as the late A. J. McCurdy.

Hawtin—That the estimates  
of the following schools be passed:  
Eyre, Glen Almond, Chest-  
eredil, Mantario, Lloyd George,  
Mayfield and Ranchview, and  
that the Council express their  
appreciation of the way in  
which these school boards have  
co-operated in reducing ex-  
penditures.

That the following be referred  
back with a request for re-  
consideration and reduce their  
assess, Kinch, Trossley, Ainslie,  
Gorefield and Craiglands. That  
Wainfleet be advised that the  
estimate is satisfactory, but  
that the Council is of opinion  
that the amount to be taxed  
for night bus reduction owing to  
the large balance the school  
has on hand.

That Clifton Bank be advised

## Whooping Cough

Whooping cough is really a  
serious condition. It is one of  
the communicable diseases.

Whooping cough in the be-  
ginning seems like a slight cold.  
There is running at the nose  
and a hoarseness or cough. Af-  
ter a week the cough gets  
worse. The child coughs many  
times in succession, each deep

that the estimate is quite sat-  
isfactory, but that the Council  
consider that it would be ad-  
visable to allow for a rather  
larger carry-over than the re-  
quisition would provide.

Montgomery—That a by-law  
be introduced to amend the By-  
law permitting animals to run  
at large in the Municipality by  
including in the area in which  
they are permitted to run:—S4  
twps. 25, rgs. 28, w9 and sections  
13 to 36 in twps. 24, rgs. 28, w 3.

The By-law was introduced  
and first reading moved Rowles,  
2nd reading moved Dahl.

On. Hawtin asked consent to  
move third reading at this  
meeting, which was given and  
same was carried unanimously.

Walker—That the R.M. Man-  
torio \$25 get behind the organi-  
zation of a Community Co-  
operative to take over the ranch  
lease in twps. 24, 25, in Ranges  
27, 28, w3.

That \$25 be advanced to cov-  
er organization expenses to be  
repaid the Municipality.

That a provisional executive  
committee consist of: Thomas  
Rowles, Edw. Kinch, Geo.  
R. Husard and O. Evans Sargent,  
and that T. Rowles be sec-  
retary-treasurer till officers are  
elected after incorporation.

That the shares be \$25 each,  
and the holders of shares to be  
entitled to pasture ten head of  
stock at the rate set by the  
elected officials for every share  
held by them. That the num-  
ber of head to be pastured be  
limited to 1,000 and the shares to  
100, and the allotment of  
same will be considered in the  
order in which they are received.

Applications to be sent to  
Thos. Rowles, Empress, or O.  
Evans Sargent, Eyre, who will  
answer any questions as to the  
scheme.

That this be advertised in the  
Alaska, Estonis, Empress and  
Kindersley papers;

That the Secretary ap-  
proach the C.R.R. in regard to  
transfer of the lease of the  
nine sections which they have  
within the ranch fence—Car-  
ried unanimously.

Kinch—That accounts be paid  
immediately funds are avail-  
able.

Hawtin—That share of ac-  
counts written off by Estonis  
Hospital as uncollectable be  
paid, \$81.10.

Hawtin—That as the borrow-  
ing powers of R. M. Mantario  
No. 262 are greatly curtailed for  
1931, the schools with re-  
quests which show the  
greatest co-operation be pro-  
tected to the amount of their  
requisition and the other schools  
be paid out of the balance  
as far as funds will permit.

Hawtin—That expenses ac-  
counts attending hospital con-  
ference be paid Walker, \$20,  
Dahl, \$4, Sargent, 2.00,  
Kinch—That indemnity fees  
be paid quarterly.

Dahl—That one half the ap-  
propriations be made according  
to the assessment. 1, \$153.00;  
2, 129.00; 3, 143.00; 301.00; 5,  
142.00 and 132.00, and that all  
monies earned be applied on  
taxes.

Montgomery—That the del-  
egates to the convention be al-  
lowed \$50 each for expenses.

Council adjourned at 6 p.m.  
to meet again on Monday, April  
6, at the Orange Hall at 10 a.m.

O. Evans Sargent,  
Secy-Secr.

sough being followed by a sharp  
inrush of air—the whoop.

The attacks may be violent  
and prolonged. The child vom-  
its frequently after an attack of  
coughing. The inability to re-  
tain food, the loss of sleep and  
the consequent strain often re-  
sult in the child's losing weight  
and becoming quite weak.

Whooping cough is serious  
because it weakens its victims  
to such an extent, that other  
diseases, particularly pneumo-  
nia and tuberculosis, find their  
chance to attack, which they  
often do, with fatal results.

There would be considerably  
fewer cases of whooping  
cough if people generally un-  
derstood that it is a serious dis-  
ease, and that it should be  
treated as such. Very often  
children suffering from whoop-  
ing cough do not receive the  
care they need and as a result  
they are more likely to develop  
pneumonia or some other seri-  
ous and frequently fatal dis-  
ease.

A child suffering from whoop-  
ing cough needs plenty of fresh  
air. Unless the weather is hot  
or he has a fever or some other  
condition which would keep him  
in bed, he should be out of  
doors every day. His room  
should be well aired nights and  
day, by keeping windows and  
doors open sufficiently to pro-  
vide for a gentle current of air  
through the room all the times.

If he vomits frequently, it  
may be found that smaller  
meals given more often will  
help.

Other persons must be  
protected, and so all the accre-  
tions from nose and throat  
should be collected on old  
cloths or paper and burned.  
The dishes should be boiled and  
kept separately. The patient

must be kept from coming into  
contact with others, particu-  
larly children.

Fortunate whooping cough  
vaccine is used in the treat-  
ment and prevention of whoop-  
ing cough. Its value has not as  
yet been definitely proved.  
Some believe that the results  
are encouraging enough to war-  
rant its use. If your family  
doctor recommends its use, you  
should accept his advice.

As whooping cough is par-  
ticularly dangerous in the first  
year of life, every effort should  
be made to protect the babies,  
and parents should never take  
a chance of allowing their  
baby to come in contact with  
children who have whooping  
cough or even colds, because  
what seems today to be only a  
cold may later turn out to be  
whooping cough or measles.

## Cream Market Report

For the week ending March  
14th, 1931, the following  
prices were paid by creameries  
per pound of butterfat, in the  
several grades of cream, and at  
the points shown:  
Jasper Dairy, Edmonton,

## Cross Canada Motor

## Trip Proves Failure

Returning from an un-  
successful attempt to cross Canada  
by motor car, Healy F. Nea-  
ham has reached Halifax via

the Can. National Railways.  
The venture came to grief when  
the car which he was driving  
overturned in the Lake Nipigon  
region in Ontario just forty  
miles from the point where a  
forest trail would have led him  
to the prairie country. He is  
still convalescing from broken  
ribs and an attack of pleurisy  
contracted at the time of the  
accident. Mr. Neaham in-  
tends to remain in Nova Scotia.  
His wife and family are at pre-  
sent residing in Montreal.
